

SMALLPOX VACCINATION PROGRAM

THE DANGER

THE VACCINE

THE PRIORITY

THE STRATEGY

SVP on-line Proficiency Training

I. DoD Smallpox Vaccination: Standard Training. This program consists of 16 lectures separate required & optional training, available in 3 training levels, depending on your job. [Click here](#) to take 1 training.

Three levels:

adverse event info

education toolkit

resource center

- (a) Medical Director. Serves as the subject-matter expert for the installation commander, w/ the Medical Commander. The Medical Director is responsible to the Medical Commander for 1 execution of the SVP, training of Clinical Consultants and Vaccination Supervisors, and training verification and training documentation of all personnel. (7.5 hours)
- (b) Clinical Consultants and Vaccination Supervisors. (6.25 hours)
 1. Clinical consultants will typically be physicians, physician assistants or nurse practitioners who provide clinical services. Clinical consultants will review individual screening before smallpox vaccination and either authorize vaccination, grant exemption from vaccination, or refer vaccine candidates for further evaluation. Clinical consultants may provide classroom education of vaccinees before vaccination.
 2. Vaccination supervisors will typically be registered nurses or physician assistants. Vaccination supervisors train and document training of vaccinators and provide direct on-site supervision of vaccinations and vaccination-clinic operations. This may include providing classroom education of vaccinees before vaccination. Vaccination supervisors ensure all vaccinees complete pre-smallpox vaccination screening form.
- (c) Vaccinators. Vaccinators administer vaccinations, provide post-vaccination instructions, and assist vaccinees in obtaining additional information. (3.25 hours)

II. The DOD Smallpox Preparedness Conference.

Held from 29 October - 1 November 2002, spanning 3.5 days and included more than 40 individual lectures, breakout sessions & discussion groups. In this program, we present the highlights of these sessions to you electronically. [Click here](#) to take the training.

To organize these presentations for you, we grouped them into 4 major modules. These modules include:

1. CORE - Major overview of the entire topic (11 presentations, 4.4 hours)
2. EPI - Epidemiologic response to a hypothetical smallpox outbreak (9 presentations, 4.7 hours)
3. VAX - More detailed issues involving smallpox vaccination (13 presentations, 6.7 hours)
4. IND - Use of medical products under protocols for IND: Investigational new drugs (8 presentations, 8.7 hours)
